Sound Tower

Operating Instruction

Dear Customer:

Thank you for purchasing 2.1 channel sound tower system. We strongly recommend that you carefully study the operating instructions before attempting to operate the unit and that you note the listed safety information.

Safety Information

1. This unit can be used only where the power supply is in accordance with the notes on the rear panel of the speaker system. It can't be used elsewhere.
2. To reduce the risk of fire or electric shock, do not expose this unit to rain or moisture.
3. When the unit is not being used, turn the unit off.
4. Do not open covers and repair by yourself. Refer all servicing to qualified personnel.
5. After turning off the unit, if you don't start the unit again in 24 hours, the time would return to the factory reset. When the unit is on, you can adjust the time, please take the operation instruction in the owner's manual for reference.
6. Remote Control Battery:
   The button battery has been installed in the remote control. When using it for the first time, just pull out the insulation layer and the remote control will be ready to use.

Battery Installation

Since the remote control will be used for many units to control operations, you should begin by installing the supplied battery:

1. Turn the remote control over and pull out the battery compartment cover.
2. Insert the battery according to the battery compartment.
3. Close the battery compartment cover.
4. Test the unit by pressing Mute or any mode key. If the battery is inserted correctly, the system will response to the instruction.

Note

- Do not leave the remote control in an extremely hot or humid place.
- Do not expose the remote sensor to direct sunlight or lighting apparatuses. Doing so may cause a malfunction.
- If you do not intend to use the remote control for an extended period of time, remove the batteries to avoid possible damage from battery leakage and corrosion.
- If you find that the remote control can be used at a normal distance to the main unit, then the battery could be weak, so you need to replace the battery with a new one.
- If battery leak, remove it immediately, and properly dispose it. Avoid touching the leaked material and splashing it to clothing, etc. Clean the battery compartment thoroughly before installing new battery.

Basic Operation

Power Up the System

Connect the AC adaptor and turn on the "power" in the back panel, the system will open automatically.

Select Sleep Mode
